DETAILED ACTION

Response to Amendment

Examiner acknowledges response by applicant's representative received 6/12/06. Examiner further acknowledges the addition of claims 25-34.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5-6, 11, 15, 25-27, 29-30, 33 & 34 are rejected under 35 U.S.C. 102(e) as being anticipated by Fineman (230)

Fineman disclosed a Card Shuffler.

Art Unit: 3711

Regarding claims 1-3, 5-6, 11, 15, 25-27, 29-30, 33 & 34

Fineman teaches a device that has an inner case with a plurality of compartments (pre-shuffler) and an outer case (main shuffler) for aligning and the outputting cards (see abstract and figures 1 and 2).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 7-10, 12-14, 28 & 31-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fineman (230) as applied to claim 1 above, and further in view of Johnson et al. (127).

Regarding claims 4 & 28

Fineman fails to teach horizontal movement of his cards with respect to the input portion of the main shuffler. Johnson teaches lateral movement of his cards during delivery (see col. 2, lines 7-14). It would have been obvious to one of ordinary skill in the art to modify Fineman to include lateral (side to side or horizontal) movement to add variety to the card handling process.

Regarding claims 7-10, 12-14 & 31-32

Fineman fails to teach a rack that rotates. Johnson teaches a carousel mechanism, with multiple compartments, which rotates in the card handling process (see abstract). It would have been obvious to modify Fineman to include a rotating mechanism to add variety to his device.

Response to Arguments

Applicant's arguments with respect to claims 1-15 & 25-34 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and are cited to show the state of art with respect to features of the claimed invention.
